# Introduction

GoMeat is a marketplace leveraging blockchain technology, connecting consumers with specialty retail meat stores that primarily offer fresh Halal and Kosher meat products such as red meat, poultry and seafood.

## Tokens and Cross-Chain Bridge

The GoMeat tokens were created on the Ethereum chain and they will be locked in the Hydra Ethereum cross-chain bridge. As a result the total supply on both sides will always be the same 5 Million. That means that the GoMeat tokens can only be swapped from Hydra to ethereum and vice versa. There are no separate circulations for each side.

Each bridge swap mandates 7 on-chain transactions. An example of a HYDRA -> ETH transaction:

- Lockup transaction that effectively moves the collateral funds into the bridge vault -> happens on HYDRA side
- 5 votes to the bridge contract on the minting side -> In this example happens on Ethereum side
- A subsequent execute vote, after the consensus is met in previous step -> On Ethereum side

And conversely an opposing setup for ETH -> HYDRA

- HYDRA-> ETH = 1 HYDRA transaction + 6 Ethereum transactions
- ETH -> HYDRA = 1 ETH transaction + 6 HYDRA transactions

More info about the Hydra Bridge on [this link](#)

More information about the flow on [this link](#)

# Contract Analysis

● Critical   ● Medium   ● Minor   ● Pass

Severity	Code	Description
●	ST	Contract Owner is not able to stop or pause transactions
●	OCTD	Contract Owner is not able to transfer tokens from specific address
●	OTUT	Owner Transfer User's Tokens
●	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
●	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
●	MT	Contract Owner is not able to mint new tokens
●	BT	Contract Owner is not able to burn tokens from specific wallet
●	BC	Contract Owner is not able to blacklist wallets from selling

# Contract Diagnostics

● Critical   ● Medium   ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination

## L01 - Public Function could be Declared External

**Criticality**

minor

**Location**

GoMeat.sol#L130

### Description

Public functions that are never called by the contract should be declared external to save gas.

fallback

### Recommendation

Use the external attribute for functions never called from the contract.

## L04 - Conformance to Solidity Naming Conventions

<b>Criticality</b>	minor
<b>Location</b>	GoMeat.sol#L60,82,108,12,24  SafeMath.sol#L9,16,22

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow `_` at the beginning of the mixed\_case match for private variables and unused parameters.

```
_y  
_x  
totalSupply  
standard  
_value  
_spender  
_to  
_from  
...
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>.

## L09 - Dead Code Elimination

**Criticality**

minor

**Location**

SafeMath.sol#L22

### Description

Functions that are not used in the contract, and make the code's size bigger.

`safeMul`

### Recommendation

Remove unused functions.

# Contract Functions

Contract	Type	Bases		
	Function Name	Visibility	Mutability	Modifiers
<b>GOMT</b>	Implementation	SafeMath		
	<Constructor>	Public	✓	-
	transfer	External	✓	validAddress
	transferFrom	External	✓	validAddress validAddress
	approve	External	✓	validAddress
	<Fallback>	Public	Payable	-

## Domain Info Of GoMeat Token

<b>Domain Name</b>	gomeat.io
<b>Registry Domain ID</b>	4584c0bb2f9a4f0e9e9dee77f884bfa1-DONUTS
<b>Creation Date</b>	2020-10-03T07:00:22Z
<b>Updated Date</b>	2022-02-22T23:40:11Z
<b>Registry Expiry Date</b>	2022-10-03T07:00:22Z
<b>Registrar WHOIS Server</b>	whois.namecheap.com
<b>Registrar URL</b>	<a href="https://www.namecheap.com/">https://www.namecheap.com/</a>
<b>Registrar</b>	NameCheap, Inc.
<b>Registrar IANA ID</b>	1068

The domain has been created in about 2 months before the creation of the audit.

There is no public billing information, the creator is protected by the privacy settings.

## Domain Info Of GoMeat Ordering Website

<b>Domain Name</b>	gomeatservices.com
<b>Registry Domain ID</b>	2263506932_DOMAIN_COM-VRSN
<b>Creation Date</b>	2018-05-14T22:10:07.00Z
<b>Updated Date</b>	2020-10-16T04:17:50.00Z
<b>Registry Expiry Date</b>	2023-05-14T22:10:07.00Z
<b>Registrar WHOIS Server</b>	whois.namecheap.com
<b>Registrar URL</b>	http://www.namecheap.com
<b>Registrar</b>	NAMECHEAP INC
<b>Registrar IANA ID</b>	1068

The domain has been created in 9 months before the creation of the audit.

There is no public billing information, the creator is protected by the privacy settings.

## Summary

GoMeat is an interesting project that has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions.

The contract does not allow transfer to the zero address.

## About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
